[About the Business](#)

[About the Products](#)

#### **GE Healthcare Primary Business Units**

GE Healthcare's *Diagnostic Imaging* business helps provide a fast, non-invasive way for doctors to see broken bones, diagnose trauma cases in the ER, view the heart and its function, or identifying the early stages of cancers or brain disorders. With X-ray, digital mammography, Computed Tomography (CT), Magnetic Resonance (MR) and Molecular Imaging technologies, GE creates industry-leading products that allow clinicians to see inside the human body more clearly than ever before.

GE Healthcare *Clinical Systems* business provides a wide range of technologies and services for clinicians and healthcare administrators that can help caregivers improve the consistency, quality and efficiency of patient care everywhere. With efforts in ultrasound, ECG, bone densitometry, patient monitoring, incubators and infant warmers, respiratory care, anesthesia management and a wide range of technologies and services for clinicians and healthcare administrators, Clinical Systems enables clinicians to provide better care for millions of patients every day - from wellness screening to advanced diagnostics to life-saving treatment.

GE Healthcare's *Life Sciences* delivers breakthroughs in drug discovery, biopharmaceutical manufacturing and the latest in cellular technologies, so scientists and

specialists around the world discover new ways to predict, diagnose and treat disease earlier. The Life Sciences business also makes systems and equipment for the purification of biopharmaceuticals.

GE Healthcare's *Medical Diagnostics* business researches, manufactures and markets innovative imaging agents used during medical scanning procedures to highlight organs, tissue and functions inside the human body, to aid physicians in the early detection, diagnosis and management of disease.
